

Adapt to the World Around You with The Tek RMD

Option A.

Adapting the world to you can get expensive

Option B.

TK Robotic
Mobilization
Device

Average Estimated
Costs to Renovate A House

Front door replaced: \$300 - \$1800
Widen interior door: \$200 - \$500 per door
Lower kitchen cabinets and counters: \$30,000 - \$50,000
Bathroom remodel: \$25,000 - \$40,000
Total: \$55,500 - \$92,300

The average eyesight height in a wheel chair is only 43 inches, while the average eyesight height of someone standing is 69 inches. That's an extra 24 inches of sight and reach.

How to schedule your first test drive with our Tek RMD and get price information for your area.

1. Visit our website: www.matiarobotics.com
2. Click on the dealers tab
3. Search for the closest distributor in your area
4. Give your nearest distributor a call
5. Schedule a test drive at the store or at your house

We do not sell directly, we sell through medical equipment suppliers.

The Tek Robotic Mobilization Device is a new mobility platform that completely re-imagines the way individuals with paraplegia, spinal cord injuries, and other walking disabilities are able to move around in the world. The ability to independently and safely sit, stand, and navigate environments that were once inaccessible is now simple and convenient. Users of the Tek RMD can enjoy spending time and conversing with friends and family at eye level.

A single device offering the enabling combination of better health, upright mobility, greater accessibility, and improved perspective is now available with the Tek RMD. With a small footprint, intuitive controls, and boarding from the back feature, the Tek RMD gives you back the freedom to use your home, office and other indoor spaces as they were meant to be used; upright and mobile.
